OVERVIEW

Radio allows you to easily capture samples from Internet radio stations. Or you can use it to listen to some unusual audio and wait for inspiration to strike.

It comes with a deliberately diverse and unusual directory of radio stations.

COMPATIBILITY

The standalone application version of Radio is compatible with OS X 10.7 or later and Windows 7 or later.

The DAW plugin is compatible with: Audio Unit 32-bit and 64-bit, VST 2.4 32-bit and 64-bit, AAX Protools 11 and later. OS X 10.7 or later and Windows 7 or later.

INTRODUCTION

A WORD ABOUT COPYRIGHT LAW

If you use samples from radio stations you will need to clear the samples for use. A music lawyer will be able to advise you on the process. The rules vary by country.[1]

There are also public domain radio stations[2] that you may be able to sample freely. Although you should satisfy yourself that the material broadcast on these stations is truly public domain.

It is a particularly bad idea to have a top ten hit using samples that you have not been authorised to use.

INTERNET CONNECTIVITY

You should try the demo before purchasing the plugin and satisfy yourself that it will work on your computer. You will require a reasonable Internet connection.

The plugin will need to receive data from Internet radio stations and must not be blocked by any security software or firewalls. If you have problems with the security software you will need to speak to your security software vendor.

THE AVAILABILITY OF INTERNET RADIO STATIONS

Internet radio stations come and go. They change their internet address, and they don't always broadcast 24 hours a day. You will get messages about stations being offline. Do not panic. Select another station.

If a station is off air for a long time we will remove it from the list of stations.

Some stations are not available in some countries.

---

[1] The BBC has some general advice here:
http://www.bbc.co.uk/programmes/profiles/1kk9DjqdJGCwJdCJZ7bqGtG/sampling

THE CONTENT

We don't control the content and you may find some stations offensive. Therefore, this plugin is not suitable for young children or those easily offended. Nor can we guarantee that all radio stations are legal in all countries.

If you would like to recommend that a station be permanently removed from the station directory, or would like something added, please e-mail radio@credland.net.

However, all these caveats aside, we think the Radio plugin is a LOT of fun. And we hope you have fun with it too!

INSTALLATION

Installation should be easy. Download the installer and double click it, follow the onscreen instructions.

The installer will, by default, install both the plugin version and the standalone application.

WINDOWS

On the PC the standalone application will be in either:

```
C:\Program Files (x86)\Credland\Radio\Radio.exe
```

or on 32-bit Windows installations:

```
C:\Program Files\Credland\Radio\Radio.exe
```

The plugin will be in your VST plugins folder. You select the location of your plugins folder when running the installer.

MAC

The Mac is a little simpler. The standalone application will be in your /Applications folder and the plugin versions will be in the system plugins folder /Library/Audio/Plug-Ins and/or your Avid plugins folder.

LOADING THE PLUGIN

Radio is both a standalone application and a plugin for your DAW.

You will find the plugin in the Instruments section of your plugin list, if your DAW organises plugins by type.

Or, if your list is organised by manufacturer, you will find it under Plugin Boutique.

BASIC OPERATION

When you first open Radio it will download the list of radio stations from our server. This will take a moment[3]. In future it will use the saved list of radio stations if an update is available from our server.

Then you can:

- Select radio stations by pressing *RANDOM* or *LOAD*
- Listen to the radio
- Select bits of audio you want to save.
- Push *SAVE SELECTIONS* to add them to the list of saved clips
- Rename the clips by right clicking on them and choosing *RENAME*.
- Drag the saved clips to your DAW or any other application

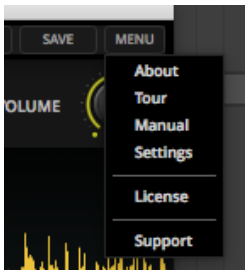

[3] In the unlikely event that it cannot download the list of stations please try again later.

LICENSING AND DEMO MODE

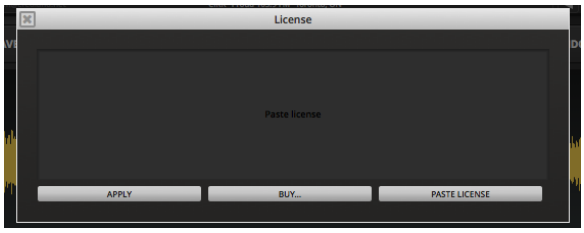

In demo mode the plugin will work for 14 days and may inject a little white noise into the stream from time to time. Once those 14 days are over you will need a license.

The license can be purchased from Plugin Boutique, and can be found in your account page on the Plugin Boutique website.

You can add a license from the plugin menu located here:

Click *License*, this window will appear:

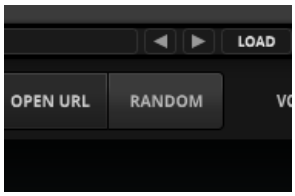

Then:

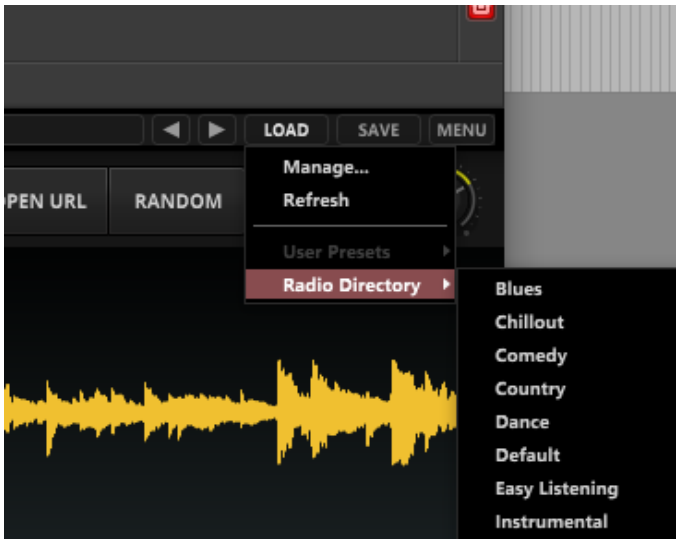

- Copy your license from the PluginBoutique site including the ---BEGIN--- and ---END--- lines.
- Click *PASTE LICENSE* in the Radio license window
- Click *APPLY* and your plugin should be fully licensed.

SELECTING RADIO STATIONS

Press the RANDOM button to select a new station.

Or click the LOAD button to see the list of available stations.

You can add a new station using the OPEN URL button – but you'll need to provide the *streaming URL* not any old URL for the radio's website or player. See Streaming URLs below.

SAMPLING

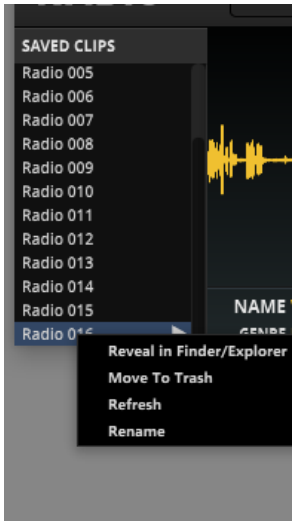

The buffer stores about 30 seconds of audio. If you want to record more than 30 seconds of audio use your DAWs track recording features.

Once you've heard something cool you can select an area of the audio using your mouse like this:

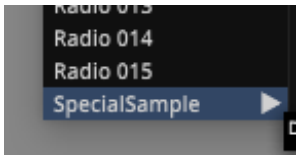

Then press SAVE ALL SELECTIONS or just wait and it'll be added to your list of saved samples on the left.

THE SAVED SAMPLES LIST

By right clicking on the sample you can rename it so you can find it later.

And you can drag from this list into your DAW, sampler or whatever.

DRAGGING ON WINDOWS

Drag and drop on Windows normally works well. If and when it fails it is usually because one application is set to run 'As Administrator'. Windows does not permit drag and drop operations between apps running with different permissions.

FX

The radio comes with simulations of the types of small speaker you would typically associate with radios.

You can turn on the effects with the FX button, and select the type of speaker from the drop-down menu.

The incoming radio will then be processed with this effect, and any future audio recorded or sampled will have the effect applied.

STREAMING URLS

This section is for the technically minded. If that isn't you, skip it.

You can add stations to Radio but you will need the streaming URL. Many radio stations make this a little hard to find. They expect you to listen using their embedded player.

The most reliable way to get the Streaming URL is to open Chrome's developer tools and select the network tab. Then hit refresh on the radio station's web page and hit play on their player.

The streaming URL will be clearly visible on the network traffic as the constantly downloading row. You can copy the link from this row and then in Radio click OPEN URL and paste the link into the Radio.

SETTINGS

Click on *MENU*, then *Settings*. Here you can specify where the plugin saves clips to, and whether the plugin shares information on radio station connectivity with our servers (so we can better maintain the list of radio stations).

SUPPORT, SUGGESTIONS AND FEEDBACK

For support and customer services visit:

Feedback and suggestions should be mailed to radio@credland.net

RADIO

THE LICENSE

Please read this licence carefully before downloading or using the software. By downloading or using the software, you are agreeing to be bound by the terms of this licence.

"Our", "Us" and "We" refer to Plugin Boutique and/or Plugin Boutique's licensor(s), partner(s) and supplier(s).

"Software" means the plug-in, application, and or other software and the related documentation.

The Software is licensed to you by Us. You do not own the Software, but may have a license to use it from us.

You acknowledge that that no title to the intellectual property in the Software is transferred to you and that full title and ownership rights to the Software remain Our property.

Radio

Radio is for listening to radio while you work or for inspirational purposes. The copyright of all sources remains with the creator, publisher or other rights holder.

If you want to use material recorded from Radio you should seek professional legal advice.

The radio streams data over the internet. You are responsible for all charges incurred while streaming.

The radio downloads a list of servers from its *directory service*. If the *directory service* becomes unavailable Radio will no longer update the list of available radio stations. We do not guarantee that the *directory service* will be available at all times, and we reserve the right to stop providing the service in the future. In the event that the *directory service* is unavailable the OPEN URL feature may allow you to continue using the Radio software.

Evaluation software

If the Software has a "demo-mode" you are permitted to use the software without obtaining a license key for the duration of the "demo-mode" only, which is 30 days from the first execution of the software on your system.

At the end of the demo period you must buy the software or delete it from your system.

Permitted Use

Under this license you are permitted to install the software on a maximum of three computers for personal use, or use in your business but you are not permitted to use more than one copy of the software at any one time.

You must not share the license key provided with anyone else, nor are you permitted to resell or transfer the license to another party.

Upgrades

If we produce Minor upgrades and bug fixes for this Software we may provide them without further charge to licensed users of the product. These upgrades and bug fixes may be provided under different or further agreements.

Major upgrades to the software are not provided free-of-charge as part of this license. The difference between a Minor upgrade and Major upgrade will be determined by Us.

Restrictions

The Software contains copyrighted material, trade secrets, and other proprietary material. In order to protect them, and except as expressly permitted by applicable law, you may not decompile, reverse engineer or disassemble the Software; copy, modify, network, or distribute the Software; or rent, lease, loan, the Software, or create derivative works based upon the Software or related documentation in whole or in part other than as expressly permitted by applicable legislation.

You may not transmit the Software from one computer to another or over a network, except as is necessary to install the Software onto a host computer for use which is compliant with this license agreement.

Termination

This Licence is effective until terminated. You may terminate this Licence at any time by destroying the Software and related documentation. This Licence will terminate immediately without notice from Plugin Boutique if you fail to comply with any provision of this Licence. Upon termination you must destroy the Software and related documentation. Upon termination you shall remain subject to the provisions, restrictions, and exclusions in this Licence Agreement and shall

have no right to any refund of any amounts paid for the Software. No termination shall release you from liability for any breach of this Licence Agreement.

Disclaimer

We provide the software "as is," and you use the software at your own risk. We make no warranties as to performance, merchantability, fitness for a particular purpose, or any other warranties whether expressed or implied. No oral or written communication from or information provided by Us shall create a warranty. Futhermore we do not warrant that defects in the software will be corrected.

Limitation on Damages

Under no circumstances shall We be liable for direct, indirect, special, incidental, or consequential damages resulting from the use, misuse, or inability to use this software, even if We have been advised of the possibility of such damages.

In no event shall Our total liability to you for all damages, losses, and causes of action (whether in contract, tort including negligence, or otherwise) exceed the amount paid by you for the Software.

Controlling Law and Severability

This Licence shall be governed by and construed in accordance with the laws of England. If for any reason a court of competent jurisdiction finds any provision of this Licence, or portion thereof, to be unenforceable, that provision of the Licence shall be enforced to the maximum extent permissible so as to effect the intent of the parties, and the remainder of this Licence shall continue in full force and effect.

Acknowledgement

You acknowledge that you have read this Licence Agreement and understand it, and agree to be bound by the terms and conditions. You also agree that the Licence Agreement is the complete and exclusive statement of agreement between the parties and supersedes all proposals or prior agreements, oral or written, and any other communications between the parties relating to the subject matter of the Licence Agreement. No amendment to or modification of this Licence will be binding unless in writing and signed by a duly authorised representative of Plugin Boutique.
